

MathIAS+[®] Premium Structural Intelligence Expertise

mathias+

RESPONSIBLE AI

From Structural Evidence to Expert Decision Intelligence

MathIAS+ Premium combines production-grade Structural Intelligence with optional expert assessments designed to interpret, challenge and deepen your structural evidence.

**One Step Beyond Analysis.
Understand the Structure.**

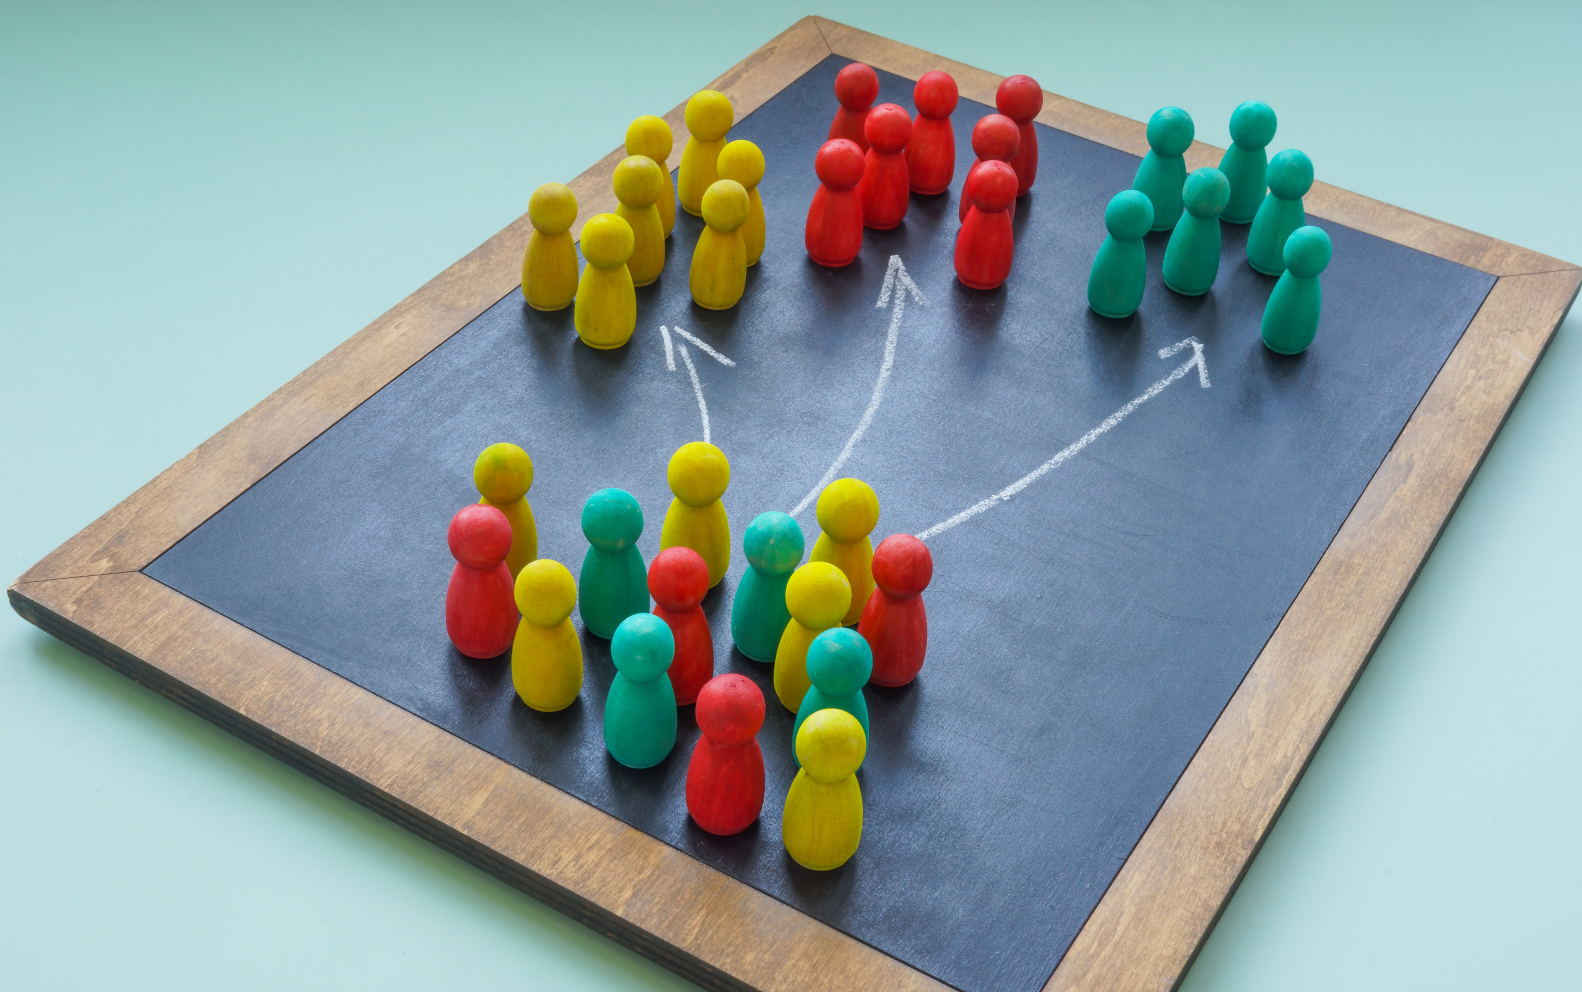

Cutting-Edge Structural Intelligence Deserves Expert Understanding

Cutting-edge Structural Intelligence can reveal patterns, relationships and structures beyond conventional analytical outputs.

Understanding what has been revealed, why it matters and where its value may lie requires expert investigation.

MSI Expertise Services extend the evidence generated by **MathIAS+ Structural Intelligence**, helping organizations move from analytical results to deeper structural understanding and decision intelligence.

**DISCOVERING
STRUCTURE IS ONLY
THE BEGINNING.**

MSI-EXPERTISE-001

Structural Intelligence Assessment

What Did the Technology Discover?

A completed MSI execution produces rich structural evidence.

MSI-EXPERTISE-001 turns that evidence into a documented expert assessment of the discovered segmentation and its most significant structural characteristics.

A Structured Expert Assessment

The investigation brings together clustering quality, candidate K analysis, structural metrics, native explainability, topology, lineage and theoretical resilience.

Material findings are consolidated to support deeper interpretation and decision-making.

FROM STRUCTURAL EVIDENCE TO EXPERT UNDERSTANDING.

MSI-EXPERTISE-002

Structural Survival Assessment

Did the Structure Survive?

A structure discovered in one execution provides a structural snapshot of the data.

MSI-EXPERTISE-002 compares two compatible MSI executions to assess how strongly the discovered structure persists when conditions change.

A Comparative Expert Assessment

The investigation evaluates structural correspondence across executions using complementary continuity and similarity measures.

Cluster correspondence, assignment stability and benchmark evidence assess how strongly MSI preserves structural continuity compared with benchmark methods when conditions change.

**PUT MATHIAS+[®] MSI
RESILIENCE TO THE
TEST.**

MSI-EXPERTISE-003

Advanced Structural Explainability Investigation

Why Do These Clusters Exist?

Describing clusters is one thing.
Investigating the structural factors and
interactions that may explain their
existence is another.

**MSI-EXPERTISE-003 investigates what
may drive the discovered structure,
combining native MSI evidence with**

**complementary analytical methods
and AI-assisted exploration where
relevant.**

A Deeper Expert Investigation

Potential explanations are tested,
challenged and qualified through expert
analysis before being retained as
supported findings.

The investigation can reveal structural
factors, interactions and relationships
that conventional cluster descriptions
may not expose.

THE ULTIMATE QUESTION: WHY?

DON'T FACE INNOVATION ALONE.

Go beyond software
access.

Connect with the Mathias
Plus R&D expertise behind
the technology.

MathIAS+ Premium gives
you access to optional
expert investigations built
on your structural evidence.
