

MathIAS+[®] Structural Intelligence Studio – CSP Partner Overview

OVERVIEW

MathIAS+[®] Structural Intelligence Studio is a decision-grade analytics SaaS designed for enterprise use.

It provides deterministic clustering and structural analysis on complex datasets, ensuring:

- full reproducibility
- auditability (dataset hashing, job tracking)
- no raw data retention

The product is built for organizations requiring responsible AI and compliant analytics workflows.

PRICING

Pricing model :

- Base subscription: ~\$45/month per workspace (access to MSI Studio)
- Usage-based pricing: \$500 to \$10,000 per analysis run depending on dataset size and complexity

USE CASES

Typical use cases :

- Customer segmentation with deterministic clustering
- Portfolio / asset structuring
- Risk grouping and regulatory analysis
- Scientific dataset structuring (public/private labs)

Key value :

- same input = same output (no stochastic drift)
- auditable and compliant (GDPR-aligned)
- designed for decision-making, not experimentation

TARGET CUSTOMERS

- Enterprises (Strategy, Risk, Data Science teams)
- Public and private research organizations
- Regulated industries requiring auditability (finance, healthcare, energy)

WHY PARTNERS SHOULD SELL IT

- High-value / low-frequency usage → strong margins
- Differentiated positioning (deterministic AI vs probabilistic tools)
- Fits compliance-driven projects (AI Act, Responsible AI) - Easy to bundle with consulting or data services

DEPLOYMENT

Type : SaaS (Azure Marketplace)

Billing : Microsoft invoiced (CSP margin applicable)

Deployment : No infrastructure required (fully managed)

Typical workflow:

- Upload dataset (Parquet format)
- Run analysis
- Download results
